What Types of Affordable Housing are Available Based on Income Level?

Public Housing

For very low-income households (typically 0–30% AMI). Public-managed housing with rent based on household income.

Rental Assistance

For very low- to low-income households (typically 0–50% AMI). Helps eligible households pay rent in private-owned housing.

Subsidized Affordable Housing

For lower-income households (typically 0–80% AMI). Apartments below market rents, available to households that meet income limits.

Moderate-Income Housing

For middle-income households (typically 80–120% AMI). Housing for who earn too much for most affordable housing but still need lower-cost options.

Market-Rate Housing

For households at any income level. Housing rented at market prices without income limits.

What happens if my income is slightly over the limit?

Unfortunately, even if you are over the income limit by a little, the government considers you to be in **the next income tier above you**.

AREA MEDIAN INCOME (AMI)

*and **why it matters** for*

AFFORDABLE HOUSING

The Neighborhood Developers

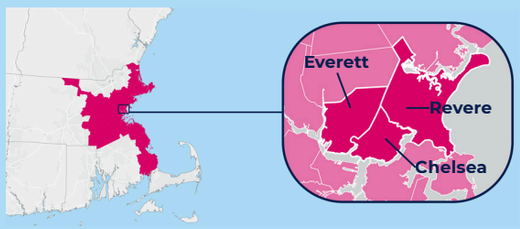

What is Area Median Income?

AMI (Area Median Income) is **the middle income level** for households in a region. Half of households earn more than the AMI, and half earn less.

Why It Matters

Different housing programs have **different income limits** for residents based on your percentage of AMI (such as 80%, 50%, or 30%). Knowing your AMI% can help you find **housing programs you may qualify for.**

What is the Current Area Median Income (AMI) in Our Area?

Boston-Cambridge-Quincy Fair Market Rent Area (100% AMI for a family of 4) $164,600

Chelsea	$72,179
Revere	$86,969
Everett	$85,218

AMI is not based only on the incomes of people in Everett, Revere, or Chelsea. Instead, government looks at **incomes across the greater Boston area**, which includes many surrounding communities.
